A CLEAR PATH TO TRANSFORMATIONAL GROWTH

The Avino Mine Property

CAUTIONARY DISCLAIMER: FORWARD-LOOKING STATEMENTS

This presentation contains “forward-looking information” and “forward-looking statements” (together, the “forward looking statements”) within the meaning of applicable securities laws and the United States Private Securities Litigation Reform Act of 1995, including the mineral resource estimate for the Company’s Avino Property, including La Preciosa, located near Durango in west-central Mexico (the “Avino Property”) with an effective date of November 30, 2022, prepared for the Company, and references to Measured, Indicated, Inferred Resources dated October 16, 2023 as well as the Prefeasibility Study dated January 16, 2024 and references to Measured, Indicated Resources, and Proven and Probable Mineral Reserves referred to in this presentation. This information and these statements, referred to herein as “forward-looking statements” are made as of the date of this document. Forward-looking statements relate to future events or future performance and reflect current estimates, predictions, expectations or beliefs regarding future events and include, but are not limited to, statements with respect to: (i) the estimated amount and grade of mineral reserves and mineral resources, including the cut-off grade; (ii) estimates of the capital costs of constructing mine facilities and bringing a mine into production, of operating the mine, of sustaining capital, of strip ratios and the duration of financing payback periods; (iii) the estimated amount of future production, both ore processed and metal recovered and recovery rates; (iv) estimates of operating costs, life of mine costs, net cash flow, net present value (NPV) and economic returns from an operating mine; and (v) the completion of the full Technical Report, including a Preliminary Economic Assessment, and its timing. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives or future events or performance (often, but not always, using words or phrases such as “expects”, “anticipates”, “plans”, “projects”, “estimates”, “envisages”, “assumes”, “intends”, “strategy”, “goals”, “objectives” or variations thereof or stating that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved, or the negative of any of these terms and similar expressions) are not statements of historical fact and may be forward-looking statements. These forward-looking statements are made as of the date of this news release and the dates of technical reports, as applicable. Readers are cautioned not to place undue reliance on forward-looking statements, as there can be no assurance that the future circumstances, outcomes or results anticipated in or implied by such forward-looking statements will occur or that plans, intentions or expectations upon which the forward-looking statements are based will occur. While we have based these forward-looking statements on our expectations about future events as at the date that such statements were prepared, the statements are not a guarantee that such future events will occur and are subject to risks, uncertainties, assumptions and other factors which could cause events or outcomes to differ materially from those expressed or implied by such forward-looking statements.

Such factors and assumptions include, among others, the effects of general economic conditions, the prices of gold, silver, and copper, changing foreign exchange rates and actions by government authorities, uncertainties associated with legal proceedings and negotiations and misjudgments in the course of preparing forward-looking information. In addition, there are known and unknown risk factors which could cause our actual results, performance or achievements to differ materially from any future results, performance or achievements expressed or implied by the forward-looking statements. Known risk factors include risks associated with project development; the need for additional financing; operational risks associated with mining and mineral processing; fluctuations in metal prices; title matters; uncertainties and risks related to carrying on business in foreign countries; environmental liability claims and insurance; reliance on key personnel; the potential for conflicts of interest among certain of our officers, directors or promoters with certain other projects; the absence of dividends; currency fluctuations; competition; dilution; the volatility of our common share price and volume; tax consequences to U.S. investors; and other risks and uncertainties. Although we have attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. We are under no obligation to update or alter any forward-looking statements except as required under applicable securities laws. We are under no obligation to update or alter any forward-looking statements except as required under applicable securities laws. For more detailed information regarding the Company including its risk factors, investors are directed to the Company’s Annual Report on Form 20-F and other periodic reports that it files with the U.S. Securities and Exchange Commission.

The Company has not based its production decisions on a feasibility study or mineral reserves demonstrating economic and technical viability, and as a result there is increased uncertainty and there are multiple technical and economic risks of failure, which are associated with these production decisions. These risks, among others, include areas that would be analyzed in more detail in a feasibility study, such as applying economic analysis to resources and reserves, more detailed metallurgy, and a number of specialized studies in areas such as mining and recovery methods, market analysis, and environmental and community impacts.

Cautionary note to U.S. Investors concerning estimates of Mineral Reserves and Mineral Resources - All reserve and resource estimates reported by Avino were estimated in accordance with the Canadian National Instrument 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum (“CIM”) Definition Standards. The U.S. Securities and Exchange Commission (“SEC”) now recognizes estimates of “measured mineral resources,” “indicated mineral resources” and “inferred mineral resources” and uses new definitions of “proven mineral reserves” and “probable mineral reserves” that are substantially similar to the corresponding CIM Definition Standards. However, the CIM Definition Standards differ from the requirements applicable to US domestic issuers. US investors are cautioned not to assume that any “measured mineral resources,” “indicated mineral resources,” or “inferred mineral resources” that the Issuer reports are or will be economically or legally mineable. Further, “inferred mineral resources” are that part of a mineral resource for which quantity and grade are estimated on the basis of limited geologic evidence and sampling. Mineral resources which are not mineral reserves do not have demonstrated economic viability.

Peter Latta, VP Technical Services, Avino, a Qualified Persons for the Company as required by NI 43-101, has reviewed the technical information concerning the properties contained in this presentation for accuracy and have authorized its disclosure.

A PRIMARY SILVER PRODUCER AND EXPLORER IN MEXICO

- GROWTH PLAN TO BECOME AN INTERMEDIATE PRODUCER

PROJECT PORTFOLIO

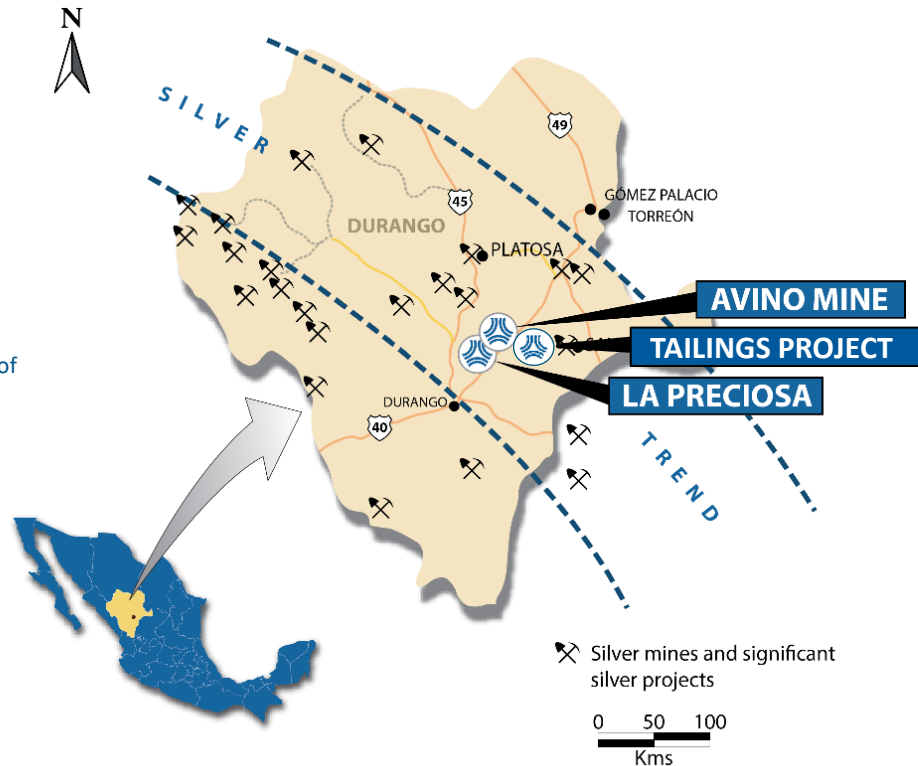

- Avino Mine - Production**
 2023 full year production within estimate – 2.4 Million AgEq ozs
 2024 target production 2.5M – 2.8M AgEq ozs
- La Preciosa - Development**
 Acquired March 2022, Adjacent to Avino Mine in Durango
- Oxide Tailings Project - Development**
 Pre-Feasibility Study Completed
 Proven and probable mineral reserves of 6.70 Million tonnes at a silver and gold grade of 55 g/t and 0.47 g/t respectively

LARGE SILVER EQUIVALENT RESOURCE BASE

- 371 million AgEq Oz - Consolidated NI 43-101 Mineral Resources at October 16, 2023
- 60% Silver - Acquisition of La Preciosa shifts resources to primarily silver

CATALYSTS FOR GROWTH - FROM 1 TO 3 PRODUCING ASSETS

- La Preciosa - Future silver production asset
- Avino – Regional Exploration and Resource Expansion for future growth production
- Oxide Tailings Project - Future gold and silver production asset

PRODUCTION PROFILE BY PROJECT

– 5 YEAR GROWTH TARGET

Transition from Single Production Operation to Three Producing Mines in Central Location

Production in AgEq ounces

PRODUCTION PROFILE – RETURN TO PRIMARY SILVER

Production by Metal

AVINO – RECENT MILESTONES AND ACHIEVEMENTS

GROWTH MILESTONES AND ACHIEVEMENTS	STATUS
Completed La Preciosa Acquisition – March 2022	✓
La Preciosa Land-Use Ejido Agreement – January 2024 <ul style="list-style-type: none"> • <i>Haulage of surface stockpiles to the Avino Mill has commenced</i> 	✓
La Preciosa Environmental Permit Submitted and Planned Works <ul style="list-style-type: none"> • <i>Further permit to be submitted to start the construction of the portal, haulage ramp, and the mining of the Gloria and Abundancia veins</i> • <i>Avino anticipates receiving these permits sometime in 2024</i> • <i>Gloria vein plans, and planned surface work</i> 	✓
Oxide Tailings Project – Pre-Feasibility Study Completed <ul style="list-style-type: none"> • <i>NPV US\$98 million (pre-tax) and US\$61 million (post-tax) at a 5% discount rate - IRR 35% (pre-tax) and 26% (post-tax)</i> • <i>Proven and Probable Reserves</i> 	✓
2023 Completed Successful Exploration Programs – 7,545 metres drilled <ul style="list-style-type: none"> • <i>Best hole drill in Company History in July</i> • <i>Hole ET 23-09: 296 AgEq g/t over 57 metres true width, incl 407 AgEq g/t over 37 metres true width & 2,866 AgEq g/t over 3.43 metres true width</i> 	✓
ESR Designation Received – 2 nd consecutive year – Award for CSR Initiatives and community support	✓
Digital Transformation: <ul style="list-style-type: none"> • <i>Mill Automation and Underground Vehicle Tracking</i> 	✓
Dry-Stack Tailings Completed and Operational	✓

FINANCIAL HIGHLIGHTS – Q4 AND FULL YEAR 2023

- Strong revenues and improved margins for Q4
- Positive net income and adjusted earnings
- Improved per ounce costs in Q4
- Operations generated cash flow
- Improved Working Capital

KEY OPERATING & FINANCIAL INFORMATION

FINANCIAL RESULTS	Q4 2023	Q4 2022	Change	FY 2023	FY 2022	Change

LA PRECIOSA – PROXIMITY TO AVINO – 19KM

The Avino Advantage:

- Dedicated powerline – 5MW
- Paved road
- High water supply
- 100% Mexican labour force

LA PRECIOSA – 1,500 DRILL HOLES

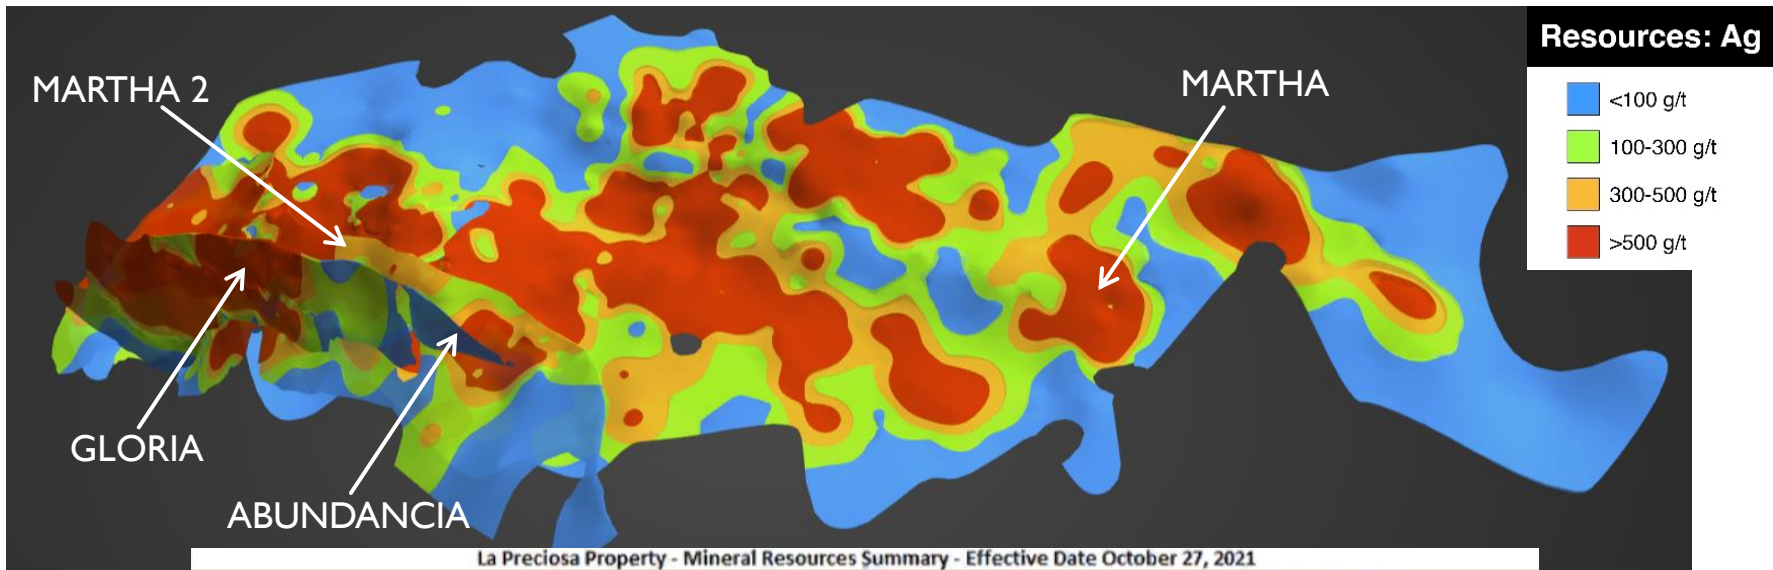

Drill Intercepts: Ag

- 150- 500 g/t
- 501- 1000 g/t
- 1000+ g/t

LA PRECIOSA – RESOURCE TABLE

La Preciosa Property - Mineral Resources Summary - Effective Date October 27, 2021

All Veins	Classification	Tonnage kt	Grade			Metal Contents

OUTLOOK FOR 2024

OUTLOOK FOR 2024

- Production of 2.5M – 2.8M AqEq ozs
- 700,000 – 750,000 tonnes planned for mill processing - sourced from Avino Mine and stockpiles from La Preciosa
- Total Capital Budget – Growth Capital, Exploration, Sustaining Capital & Mine Development = US \$7.3M – US\$9.0M
 - **La Preciosa** includes surface works and equipment procurement, and environmental permit has been submitted (\$3M - \$4M capital budget)
 - **Avino** includes budgeted sustaining capital and mine development, overhauls of fleet, maintenance

CSR INITIATIVES

IN THE COMMUNITIES OF SAN JOSE DE AVINO, ZARAGOZA AND PANUCO

CSR team in Durango, MX - Focused on Education, Community Support and the Economy of the Family

- Avino Follows the ESG and United Nations Sustainable Development Goals that work together to address the most pressing challenges facing the world, and specifically in our communities
- Major objective - to make a positive impact on our communities and society
- Keeping lines of communication open with local community leaders
- Provide educational tools (TV screens and Tablets to the schools)
- Provide road maintenance and repairs
- Provide workshops for the women in the communities
- Provide health & wellbeing educations
- Deliver trees, recycle containers and provide community park maintenance
- Received the CSR award for 2nd year in a row by the Mexican Center for Philanthropy (Cemefi) and the Alliance for Corporate Social Responsibility (AliaRSE)

SUSTAINABLE
DEVELOPMENT GOALS

WHY INVEST?

- A primary silver producer and explorer in Mexico
- La Preciosa land agreement milestone achieved - haulage of stockpiles commenced to Avino mill
- Pre-Feasibility Study on the Oxide Tailings Project – complete
Inaugural reserves for Avino of 6.7 million tonnes of proven and probable mineral reserves
- Large endowment of metal 371 million AgEq resource ounces – decades of mine life
- Longevity – 56 years, proven track record
- Undervalued relative to our silver peers on P/NAV and EV/oz by many multiples
- Strengthened balance sheet and strong trading liquidity

**5 YEAR GOAL -
STRATEGIC PLAN TO GROW ORGANICALLY & ACHIEVE INTERMEDIATE PRODUCER STATUS
LARGEST EXPANSION IN COMPANY HISTORY!**

FOOTNOTES

Slides 8 - 10- Cash Costs and AISC per silver payable ounce and Cost per tonne processed

The Company reports non-IFRS measures which include EBITDA, adjusted earnings, cash flow per share, capital expenditures, free-cash flow and AISC (All-in sustaining cash costs). These measures are widely used in the mining industry as a benchmark for performance, but do not have a standardized meaning and the calculation methods may differ from methods used by other companies with similar reported measures. See Non-IFRS Measures section for further information and detailed reconciliations.

Slide 19 – Updated Mineral Resources

1. Figures may not add to totals shown due to rounding.
2. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
3. The Mineral Resource estimate is classified in accordance with the CIM Definition Standards for Mineral Resources and Mineral Reserves incorporated by reference into NI 43-101 Standards of Disclosure for Mineral Projects.
4. Mineral Resources are stated inclusive of Mineral Reserves.
5. Based on recent mining costs provided by Tetra Tech, Mineral Resources are reported at cut-off grades 60 g/t, 130 g/t, and 50 g/t AgEq grade for ET, San Gonzalo, and oxide tailings, respectively.
6. AgEq or silver equivalent ounces are notational, based on the combined value of metals expressed as silver ounces.
7. Metal price assumptions are US\$21/tr.oz. Ag; US\$1800/tr.oz. Au.
8. Metal recovery is based on operational results and column testing, 82% Ag and 78% Au, respectively.
9. The silver equivalent for the mineral resources was back-calculated using the following formulae:
 - a) ET, Guadalupe, La Potosina: $\text{AgEq} = \text{Ag (g/t)} + 71.43 * \text{Au (g/t)} + 113.04 * \text{Cu (\%)}$
 - b) San Gonzalo: $\text{Ag Eq} = \text{Ag (g/t)} + 75.39 * \text{Au (g/t)}$
 - c) Oxide Tailings: $\text{Ag Eq} = \text{Ag (g/t)} + 81.53 * \text{Au (g/t)}$

Slide 26 - 28 – Sources: Company Material, Refinitiv Eikon (1) As of December 29, 2023 close (2) Based on fully diluted shares using the treasury stock method; (3) Silver equivalent is calculated using the following assumptions: Silver of \$24.00/oz, gold price of \$2,000/oz, copper price of \$3.25/lb, zinc price of \$1.10/lb, lead price of \$1.00/lb; (4) AgEq presented herein for Avino may differ from those presented elsewhere in this presentation.

Slide 30 – Q4 and Full Year 2023 Production Results

1. In Q4 2023, AgEq was calculated using metals prices of \$23.23 oz Ag, \$1,977 oz Au and \$3.71 lb Cu. In Q4 2022, AgEq was calculated using metals prices of \$21.18 oz Ag, \$1,729 oz Au and \$3.63 lb Cu. For FY 2023, AgEq was calculated using metals prices of \$23.39 oz Ag, \$1,943 oz Au and \$3.85 lb Cu. For FY 2022, AgEq was calculated using metal prices of \$21.75 oz Ag, \$1,801 oz Au and \$4.00 lb Cu.

2. “Silver equivalent payable ounces sold” for the purposes of cash costs and all-in sustaining costs consists of the sum of payable silver ounces, gold ounces and copper tonnes sold, before penalties, treatment charges, and refining charges, multiplied by the ratio of the average spot gold and copper prices to the average spot silver price for the corresponding period.

3. The Company reports non-IFRS measures which include cash cost per silver equivalent payable ounce and all-in sustaining cash cost per payable ounce, EBITDA, adjusted earnings, adjusted earnings per share, and working capital. These measures are widely used in the mining industry as a benchmark for performance, but do not have a standardized meaning and the calculation methods may differ from methods used by other companies with similar reported measures. See Non-IFRS Measures section for further information and detailed reconciliations

Q4 AND FULL YEAR 2023 PRODUCTION RESULTS

Q4 2023 COMPARED TO Q4 2022

FULL YEAR 2023 COMPARED TO FULL YEAR 2022

- 2023 Production – mined in lower grade areas, and decreased recovery rates
- December production – notable increase in grades and recovery
- Looking for that trend to continue into Q1 2024
- For 2024, approximately 700,000-750,000 tonnes are planned for mill processing and will be sourced from both the Avino Mine and stockpiles from La Preciosa.
- Based on current metal prices, the Company expects to produce between 2.5M and 2.8M silver equivalent ounces.

*See Footnotes in Appendix A

APPENDIX A
