### **1. NATURE OF OPERATIONS**

Avino Silver & Gold Mines Ltd. (the “Company” or “Avino”) was incorporated in 1968 under the laws of the Province of British Columbia, Canada. The Company is engaged in the production and sale of silver, gold, and copper and the acquisition, exploration, and advancement of mineral properties.

The Company’s head office and principal place of business is Suite 900, 570 Granville Street, Vancouver, BC, Canada. The Company is a reporting issuer in Canada and the United States, and trades on the Toronto Stock Exchange (“TSX”), the NYSE American, and the Frankfurt and Berlin Stock Exchanges.

The Company operates the Avino Mine which produces copper, silver and gold at the historic Avino property in the state of Durango, Mexico. The Company also owns interests in mineral properties located in British Columbia and Yukon, Canada.

### **2. BASIS OF PRESENTATION**

#### **Statement of Compliance**

These unaudited condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard (“IAS”) 34 – Interim Financial Reporting under International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”). These unaudited condensed consolidated interim financial statements follow the same accounting policies and methods of application as the most recent annual audited consolidated financial statements of the Company. These unaudited condensed consolidated interim financial statements do not contain all of the information required for full annual consolidated financial statements. Accordingly, these unaudited condensed consolidated interim financial statements should be read in conjunction with the Company’s December 31, 2022, annual consolidated financial statements, which were prepared in accordance with IFRS as issued by the IASB.

These unaudited condensed consolidated interim financial statements are expressed in US dollars and have been prepared on a historical cost basis except for financial instruments that have been measured at fair value. In addition, these unaudited condensed consolidated interim financial statements have been prepared using the accrual basis of accounting on a going concern basis.

#### **Critical Accounting Judgments and Estimates**

The Company’s management makes judgments in its process of applying the Company’s accounting policies to the preparation of its unaudited condensed consolidated interim financial statements. In addition, the preparation of financial data requires that the Company’s management make assumptions and estimates of the impacts on the carrying amounts of the Company’s assets and liabilities at the end of the reporting period from uncertain future events and on the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates as the estimation process is inherently uncertain. Estimates are reviewed on an ongoing basis based on historical experience and other factors that are considered to be relevant under the circumstances. Revisions to estimates and the resulting impacts on the carrying amounts of the Company’s assets and liabilities are accounted for prospectively.

The critical judgments and estimates applied in the preparation of the Company’s unaudited condensed consolidated interim financial statements for the nine months ended September 30, 2023, are consistent with those applied and disclosed in Note 2 to the Company’s audited consolidated financial statements for the year ended December 31, 2022.

### 3. RECENT ACCOUNTING PRONOUNCEMENTS

#### New and amended IFRS that are effective for the current year:

In the current year, the Company has applied the below amendments to IFRS Standards and Interpretations issued by the IASB that were effective for annual periods that begin on or after January 1, 2023. These standards did not have a material impact on the Company's disclosures or on the amounts in the current reporting periods.

#### Amendments to IAS 1 – Presentation of Financial Statements and IFRS Practice Statement 2 Making Material Judgments – Disclosure of Accounting Policies

The amendments change the requirements in IAS 1 with regards to disclosure of accounting policies. The amendments replace all instances of the term "significant accounting policies" with "material accounting policy information." Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements.

The supporting paragraphs in IAS 1 are also amended to clarify that accounting policy information that relates to immaterial transactions, other events, or conditions, is immaterial and not required to be disclosed. Accounting policy information may be material because of the nature of the related transactions, other events,

or conditions, even of the amounts are immaterial. However, not all accounting policy information relating to material transactions, other events, or conditions, is itself material. The IASB has also developed guidance and examples to explain and demonstrate the application of the “four-step materiality process” described in IFRS Practice Statement 2.

The amendments were applied effective January 1, 2023, and did not have a material impact on the Company’s interim consolidated financial statements.

### Amendments to IAS 8 – Accounting Policies, Changes in Accounting Estimates and Errors – Definition of Accounting Estimates

The amendments replace the definition of a change in accounting estimates with a definition of accounting estimates. Under the new definition, accounting estimates are “monetary amounts in financial statements that are subject to measurement uncertainty.”

The definition of a change in accounting estimates was deleted; however, the IASB retained the concept of changes in accounting estimates in the Standard with the following clarifications:

- A change in accounting estimate that results from new information or new developments is not a correct of an error
- The effects of a change in an input or a measurement technique used to develop an accounting estimate are changes in accounting estimates if they do not result from the correction of prior period errors

The amendments were applied effective January 1, 2023, and did not have a material impact on the Company’s interim consolidated financial statements.

### Amendments to IAS 12 – Deferred Tax Related to Assets and Liabilities Arising from a Single Transaction

The amendments clarify that companies are required to recognize deferred taxes on transactions where both assets and liabilities are recognized, such as with leases and decommissioning liabilities. The amendments were applied effective January 1, 2023, and did not have a material impact on the Company’s interim consolidated financial statements.

### **Future Changes in Accounting Policies Not Yet Effective as at September 30, 2023:**

Certain new accounting standards and interpretations have been published that are not mandatory for the current period and have not been early adopted. These standards are not expected to have a material impact on the Company in the current or future reporting periods.

### Amendments to IAS 1 – Classification of Liabilities as Current or Non-Current with Covenants

The amendments aim to promote consistency in applying the requirements by helping companies determine whether, in the statement of financial position, debt and other liabilities with an uncertain settlement date should be classified as current (due or potentially due to be settled within one year) or non-current.

In addition, the amendment requires entities to disclose information to enable users of the financial statements to understand the risk that non-current liabilities with covenants could become repayable within twelve months. The amendments are applied on or after the first annual reporting period beginning on or after January 1, 2024, with early application permitted. The amendment is not expected to have a material impact on the Company’s consolidated financial statements.

### Amendments to IFRS 16 – Lease Liability in a Sale and Leaseback

The amendments require a seller/lessee to subsequently measure lease liabilities arising from a leaseback in a way that it does not recognize any amount of the gain or loss that relates to the right of use it retains. The

new requirements do not prevent a seller/lessee from recognizing in profit or loss any gain or loss relating to the partial or full termination of a lease. A seller-lessee applies the amendments retrospectively in accordance with IAS 8 *Accounting Policies, Change in Accounting Estimates and Errors* to sale or leaseback transactions entered into after the date of initial application.

The amendments are applied on or after the first annual reporting period beginning on or after January 1, 2024, with early application permitted. The amendment is not expected to have a material impact on the Company's consolidated financial statements.

#### 4. ACQUISITION OF LA PRECIOSA

On March 21, 2022, the Company closed the acquisition with Coeur Mining Inc. ("Coeur") of all of the issued and outstanding shares of Proyectos Mineros La Preciosa S.A de C.V, a Mexican corporation, and Cervantes LLC, a Delaware LLC, that together hold the La Preciosa property in Mexico ("La Preciosa").

Total consideration paid to Coeur was comprised of:

- a) Cash consideration of \$15.3 million paid;
- b) A promissory note for \$5 million in favour of Coeur, payable without interest on or before March 21, 2023 (paid prior to March 21, 2023);
- c) 14,000,000 common shares of Avino, with a value of \$13.65 million on issuance;
- d) 7,000,000 share purchase warrants with a total value at \$2.24 million exercisable at \$1.09 per share until September 21, 2023, representing a 25% premium to Avino's 20-day volume weighted average trading price as of October 26, 2021;

Additionally, Avino issued the following consideration for which payment is contingent on a future event and due to acquisition date uncertainty these are valued at Nil. A liability for these contingent payments will be recognized when related activity and events occur.

- e) An additional cash payment of \$8.75 million, to be paid no later than 12 months after initial production at La Preciosa, up to one-half of which may be paid in common shares of Avino (provided Coeur's total shareholdings cannot exceed 19.9% of the Company's total issued and outstanding shares);
- f) A 1.25% net smelter returns royalty on the Gloria and Abundancia areas of La Preciosa, and a 2.00% gross value royalty on all other areas of La Preciosa; and
- g) A payment of \$0.25 per silver equivalent ounce (subject to inflationary adjustment) of new mineral reserves (as defined by NI 43-101) discovered and declared outside of the current mineral resource area at La Preciosa, subject to a cap of \$50 million, and any such payments will be credited against any existing or future payments owing on the gross value royalty.

The transaction has been accounted for as an asset acquisition as La Preciosa is in the exploration and evaluation stage and had not demonstrated technical feasibility, commercial viability, or the ability to provide economic benefits. La Preciosa did not have the workforce, resources and/or reserves, mine plan, or financial resources to meet the definition of a business for accounting purposes.

### 13. WARRANT LIABILITY

The Company's warrant liability arises as a result of the issuance of warrants exercisable in US dollars. As the denomination is different from the Canadian dollar functional currency of the entity issuing the underlying shares, the Company recognizes a derivative liability for these warrants and re-measures the liability at the end of each reporting period using the Black-Scholes model. Changes in respect of the Company's warrant liability are as follows:

	September 30, 2023	December 31, 2022
Balance at beginning of the period	\$ 475	\$ 741
Warrants issued	-	2,240
Fair value adjustment	(478)	(2,935)
Effect of movement in exchange rates	3	(111)
Balance at end of the period	\$ -	\$ 475

Continuity of warrants during the periods is as follows:

	Underlying Shares	Weighted Average Exercise Price
Warrants outstanding and exercisable, January 1, 2022	1,950,412	\$0.80
Granted	7,000,000	\$1.09
Warrants outstanding and exercisable, December 31, 2022	8,950,412	\$1.03
Expired	(8,950,412)	\$1.03
Warrants outstanding and exercisable, September 30, 2023	-	-

As at September 30, 2023, the weighted average remaining contractual life of warrants outstanding was Nil years (December 31, 2022 – 0.73 years).

Valuation of the warrant liability requires the use of estimates and assumptions including the expected stock price volatility. The expected volatility used in valuing warrants is based on volatility observed in historical periods. Changes in the underlying assumptions can materially affect the fair value estimates. The fair value of the warrant liability was calculated using the Black-Scholes model with the following weighted average assumptions and resulting fair values:

	September 30, 2023	December 31, 2022
Weighted average assumptions:		
Risk-free interest rate	-%	4.07%
Expected dividend yield	-%	0%
Expected warrant life (years)	-	0.73
Expected stock price volatility	-%	56.80%
Weighted average fair value	\$ -	\$0.05

The present value of the obligation was calculated using a risk-free interest rate of 9.61% (December 31, 2022 – 9.65%) and an inflation rate of 4.00% (December 31, 2022 – 7.82%). Reclamation activities are estimated to begin in 2025 for the San Gonzalo Mine and in 2041 for the Avino Mine.

**20. FINANCIAL INSTRUMENTS**

The fair values of the Company's amounts due to related parties and accounts payable approximate their carrying values because of the short-term nature of these instruments. Cash, amounts receivable, long-term investments, and warrant liability are recorded at fair value. The carrying amounts of the Company's term facility, equipment loans, and finance lease obligations are a reasonable approximation of their fair values based on current market rates for similar financial instruments.

The Company's financial instruments are exposed to certain financial risks, including credit risk, liquidity risk, and market risk.

### (a) Credit Risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Company has exposure to credit risk through its cash, long-term investments and amounts receivable. The Company manages credit risk, in respect of cash and short-term investments, by maintaining the majority of cash and short-term investments at highly rated financial institutions.

The Company is exposed to a significant concentration of credit risk with respect to its trade accounts receivable balance because all of its concentrate sales are with three (December 31, 2022 – two) counterparties (see Note 21). However, the Company has not recorded any allowance against its trade receivables because to-date all balances owed have been settled in full when due (typically within 60 days of submission) and because of the nature of the counterparties.

The Company's maximum exposure to credit risk at the end of any period is equal to the carrying amount of these financial assets as recorded in the unaudited condensed consolidated interim statement of financial position. At September 30, 2023, no amounts were held as collateral.

### (b) Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in satisfying financial obligations as they become due. The Company manages its liquidity risk by forecasting cash flows required by its operating, investing and financing activities. The Company had cash at September 30, 2023, in the amount of \$1,856 and working capital of \$7,445 in order to meet short-term business requirements. Accounts payable have contractual maturities of approximately 30 to 90 days, or are due on demand and are subject to normal trade terms. The current portions of note payable and finance lease obligations are due within 12 months of the condensed consolidated interim statement of financial position date. Amounts due to related parties are without stated terms of interest or repayment.

The maturity profiles of the Company's contractual obligations and commitments as at September 30, 2023, are summarized as follows:

	Total	Less Than 1 Year	1-5 years	More Than 5 Years
Accounts payable and accrued liabilities	\$ 11,675	\$ 11,675	\$ -	\$ -
Minimum rental and lease payments	850	105	347	398
Equipment loans	439	191	248	-
Finance lease obligations	3,796	1,918	1,878	-
Total	\$ 16,760	\$ 13,889	\$ 2,473	\$ 398

### (c) Market Risk

Market risk consists of interest rate risk, foreign currency risk and price risk. These are discussed further below.

#### Interest Rate Risk

Interest rate risk consists of two components:

- (i) To the extent that payments made or received on the Company's monetary assets and liabilities are affected by changes in the prevailing market interest rates, the Company is exposed to interest rate cash flow risk.
- (ii) To the extent that changes in prevailing market rates differ from the interest rates on the Company's monetary assets and liabilities, the Company is exposed to interest rate price risk.

## AVINO SILVER & GOLD MINES LTD.

Notes to the unaudited condensed consolidated interim financial statements

For the nine months ended September 30, 2023 and 2022

(Expressed in thousands of US dollars, except where otherwise noted)

In management's opinion, the Company is not materially exposed to interest rate risk, as any material debt obligations that bear interest are fixed and not subject to floating interest rates. A 10% change in the interest rate would not result in a material impact on the Company's operations.

### Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company is exposed to foreign currency risk to the extent that the following monetary assets and liabilities are denominated in Mexican pesos and Canadian dollars:

	September 30, 2023		December 31, 2022	
	MXN	CDN	MXN	CDN
Cash	\$ 2,451	\$ 113	\$ 4,097	\$ 250
Due from related parties	2,310	-	1,402	-
Long-term investments	-	1,204	-	2,365
Reclamation bonds	-	6	-	4
Amounts receivable	6,478	56	-	34
Accounts payable and accrued liabilities	(93,198)	(346)	(85,486)	(108)
Due to related parties	-	(135)	-	(135)
Finance lease obligations	(598)	(256)	(161)	(343)
Net exposure	(82,557)	642	(80,148)	2,067
US dollar equivalent	\$ 468	\$ (43)	\$ (4,136)	\$ 1,526

Based on the net US dollar denominated asset and liability exposures as at September 30, 2023, a 10% fluctuation in the US/Mexican and Canadian/US exchange rates would impact the Company's earnings for the nine months ended September 30, 2023, by approximately \$425 (year ended December 31, 2022 - \$275). The Company has not entered into any foreign currency contracts to mitigate this risk.

### Price Risk

Price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from interest rate risk or foreign currency risk.

The Company is exposed to price risk with respect to its amounts receivable, as certain trade accounts receivable are recorded based on provisional terms that are subsequently adjusted according to quoted metal prices at the date of final settlement. Quoted metal prices are affected by numerous factors beyond the Company's control and are subject to volatility, and the Company does not employ hedging strategies to limit its exposure to price risk. At September 30, 2023, based on outstanding accounts receivable that were subject to pricing adjustments, a 10% change in metals prices would have an impact on net earnings (loss) of approximately \$58 (December 31, 2022 - \$65).

The Company is exposed to price risk with respect to its long-term investments, as these investments are carried at fair value based on quoted market prices. Changes in market prices result in gains or losses being recognized in net income (loss). At September 30, 2023, a 10% change in market prices would have an impact on net earnings (loss) of approximately \$87 (December 31, 2022 - \$175).

The Company's profitability and ability to raise capital to fund exploration, evaluation and production activities is subject to risks associated with fluctuations in mineral prices. Management closely monitors commodity prices, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

*(d) Classification of Financial Instruments*

IFRS 13 *Financial Instruments: Disclosures* establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value as follows:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following table sets forth the Company's financial assets and financial liabilities measured at fair value on a recurring basis by level within the fair value hierarchy as at September 30, 2023:

	Level 1	Level 2	Level 3
<b>Financial assets</b>			
Cash	\$ 1,856	\$ -	\$ -
Amounts receivable	-	2,473	-
Long-term investments	891	-	-
<b>Total financial assets</b>	<b>\$ 2,747</b>	<b>\$ 2,473</b>	<b>\$ -</b>

The Company uses Black-Scholes model to measure its Level 3 financial instruments. As at September 30, 2023, the Company's has no Level 3 financial instruments.
