

Avino has drilled 40 holes on its Mexican property in 2007 totalling 8537.70 metres.

Exploration has focused on the area of the San Gonzalo Zone, where drilling has encountered significant silver, gold, zinc, lead and copper mineralization. Exploration is also underway on the La Estela, Cerro San Jose, Los Angeles and Nuestra Senora zones. Avino is presently working towards compilation of an NI 43-101 resource calculation at San Gonzalo.
